SKILLS

- **Languages:** Java, Python, C/C++, JavaScript
- **Backend:** Spring Boot, Spring Security, Spring Cloud, JPA, Hibernate
- **Machine Learning:** Pandas, NumPy, Scikit-learn
- **Database:** MySQL, PostgreSQL, Redis
- **Tools:** Git, Docker, Postman, RabbitMQ, JUnit 5, Mockito, Kafka, JMeter, JIRA
- **Core Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)
- **Soft Skills:** Problem-Solving, Team Management, Empathy, Adaptability

PROJECTS

BlockVerse | Java, Spring Boot, MySQL, Kafka, WebSocket/STOMP, AWS S3, Bucket4j | Link — Mar' 2026

- Built a real-time collaborative doc platform with **WebSocket/STOMP**, **Kafka**, and **JWT** auth — held **9ms** avg latency at 350 concurrent users, **139.8 req/s**, **0% error rate** under stress test.
- Caught **LIKE** search collapsing to **13s** avg at load; migrated to **MySQL FULLTEXT** indexes and brought it down to **3ms** a **4,400x** improvement at 350 users, **0% error rate**.
- Owned end-to-end backend architecture for a multi-tenant workspace platform — **S3** file pipeline, rate limiting across 8 action types, and role-based access control with full **audit trail** on every mutation.

PayFlux | Java, PostgreSQL, Spring Boot, Spring Cloud Gateway, Kafka, Redis | Link — Dec' 2025

- Architected 6-microservice payment platform with API Gateway handling **JWT** auth and **Redis-backed** rate limiting (10 req/s, burst 20); sustained **29.6 req/s** at **255ms p50** under 100 concurrent users with **0% error rate**.
- Engineered compensation-based **saga** for cross-service consistency — automatic sender refund on receiver failure; designed 2-phase **hold/capture** wallet mechanism mirroring real payment pre-authorization flows.
- Prevented double-spend via **JPA PESSIMISTIC_WRITE** locks; implemented idempotent **Kafka** consumers across 2 consumer groups **decoupling** notifications and rewards from the critical path.

Quiz Web App | Java, Spring Boot, Spring Cloud, Docker, PostgreSQL, JPA, JUnit, Mockito | Link — Oct' 2025

- Architected and built a distributed backend for a quiz platform using a **microservices** architecture, maintaining a **sub-200ms response time** for API requests under simulated load.
- Developed independent, domain-driven **microservice** with dedicated **PostgreSQL** databases, managing over **5,000+ quiz entities** and relationships effectively using Spring Data JPA.
- Defined core features by orchestrating communication between services via **Spring Cloud Feign,** reducing inter-service communication overhead by **20%** through optimized API Gateway routing.

TRAINING

Data Structures and Algorithms by Lovely Professional University: | Link — Jul' 2025

- Mastered core data structures and complexity analysis, elevating execution efficiency by **40%** through rigorous Big-O evaluation.
- Solved **150+** challenges using dynamic programming and sliding-window techniques, prioritizing minimal memory consumption and optimal runtimes.
- Refined analytical logic and pattern detection, consistently placing in the **top 25%** during global LeetCode contest.

CERTIFICATES

- AWS Certified Cloud Practitioner | Link — Feb' 2026
- OCI AI Foundations Associate by Oracle | Link — Oct' 2025
- Java Microservices with Spring Boot and Spring Cloud by Coursera | Link — Sep' 2025
- Cloud Computing | Link — Apr' 2025

ACHIEVEMENTS

- Solved more than 710 questions on LeetCode | Link — Mar' 2026
- Solved more than 130 questions on GeeksforGeeks | Link — Mar' 2026
- HackerRank: 5 Star Java, 5 Star Python | Link — Oct' 2025

EDUCATION

- **Lovely Professional University** — *Phagwara, Punjab*
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.4*** — *Aug' 2023 - Present*
- ***Herman Gmeiner School*** — *Varanasi, Uttar Pradesh*
  Intermediate; ***Percentage: 62%*** — *Apr' 2021 – Mar' 2022*
- ***St Xavier High School*** — *Mau, Uttar Pradesh*
  Matriculation; ***Percentage: 68%*** — *Apr' 2019 – Mar' 2020*
