SUMMER TRAINING

Lovely Professional University: Java, IntelliJ, LeetCode, Git, GitHub **Jun 2025 – Jul 2025**

- Mastered core data structures and complexity analysis, elevating execution efficiency by 40% through rigorous Big-O evaluation.
- Solved 250+ challenges using dynamic programming and sliding-window techniques, prioritizing minimal memory consumption and optimal runtimes.
- Refined analytical logic and pattern detection, consistently placing in the top 15% during global competitive coding contests.

Projects

BlockVerse| *Java, Spring Boot, Spring Security, JPA/Hibernate, MySQL, JWT, JUnit 5* **Feb 2026 - Mar 2026**

- Engineered adjacency-list block tree with BIGINT gap ordering (1k intervals) enabling O(1) mid-list inserts and O(n) reconstruction via single-query flat fetch — no recursive joins, zero N+1 queries.
- Designed optimistic concurrency control via JPA @Version preventing lost edits under concurrent updates; enforced 3-tier RBAC (Owner → Admin → Member) with atomic @Transactional ownership transfer across 14 endpoints.
- Optimized block retrieval via composite index on (document_id, position) with document-scoped parent validation — single-query full tree load regardless of depth.
- Repository Link: **https://github.com/Rajj23/BlockVerse**

PayFlux | Java, Spring Boot, Spring Cloud Gateway, Kafka, Redis, MySQL, Docker **Nov 2025 - Jan 2026**

- Architected 6-microservice payment platform with API Gateway handling JWT auth and Redis-backed rate limiting (10 req/s, burst 20); sustained 29.6 req/s at 255ms p50 under 100 concurrent users with 0% error rate.
- Engineered compensation-based saga for cross-service consistency — automatic sender refund on receiver failure; designed 2-phase hold/capture wallet mechanism mirroring real payment pre-authorization flows.
- Prevented double-spend via JPA PESSIMISTIC_WRITE locks; implemented idempotent Kafka consumers (unique transactionId constraint) across 2 consumer groups decoupling notifications and rewards from the critical path.
- Repository Link: **https://github.com/Rajj23/PayFlux**

Certificates / Certifications

AWS Certified Cloud Practitioner **Feb 2026**
AWS — Certificate Link

OCI AI Foundations Associate **Oct 2025**
Oracle — Certificate Link

Building Scalable Java Microservices with Spring Boot and Spring Cloud **Sep 2025**
Coursera — Certificate Link

Cloud Computing **Apr 2025**
NPTEL — Certificate Link

Skills

Languages C++, Java, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Apache Kafka, Redis,

Cloud & Tools: AWS (Cloud Practitioner), Docker, Git, Maven, Postman

Domain Skills: Data Structures and Algorithms, Problem-Solving, JWT, RBAC, Microservices, Database Design

Education

Lovely Professional University **2023 – 2027**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.41 *Phagwara, Punjab*

Herman Gmeiner School **2020 – 2022**
12th — Percentage: 62% *Varanasi, Uttar Pradesh*

St Xavier High School **2018 – 2020**
10th — Percentage: 68% *Mau, Uttar Pradesh*
